

How secure is your play area ?

Features include

- Soft padded gate arm
- Colourful, friendly appearance
- Remote electric release
- Minimises finger trapping risk

Kiddigate is a first step in providing a softer, safer and friendlier face to the increasing problem of securing children in Play Areas.

Simple electric unlocking and soft closing, with ample padding dramatically reduces the risk of hurt or distress to children.

Controlled access for children's play areas

SOMETHING NEW ...

Traditional turnstiles, gates and barriers have been designed with little or no regard for the young children using them.

Kiddigate is a first step in providing a softer, safer and friendlier face to the increasing problem of securing children in Play Areas, Family Entertainment Centres, Soft-play, etc.

Simple electric unlocking and soft closing, with ample padding dramatically reduces the risk of hurt or distress to children.

Designed for care...

- Soft padded gate arm, but strong underneath
- Colourful, friendly appearance. Red and green "traffic lights" on gate for children to follow
- Remote electric release bi-directional. May be restricted to one direction
- Careful design minimises finger trapping risk
- Safety features include battery backup, fire alarm interface and power fail to safety
- Full height gate panel, down to 100mm from the floor
- Plastic infill panel. White or clear. Standard graphic, no graphic or custom with your logo
- Easy installation. Can be installed by a qualified electrician
Remote power supply and control unit - low voltage only at gate
- Full height barrier options to match.
Post and rail with in-fills, padded options

Remote Control Pad

Control access to play areas with unique anti tamper alarm system that prevents forced entry or exit.

"Traffic Light" Indicators

Working from remote control pad clearly indicates green for go and red for stop.

Control Unit with Power Supply & Battery

Works independently of mains electricity. Can be integrated to fire and security alarms for instant door release. Manage child flow automatically counts kids in and out.
